

Founded in 2001 by President and Principal Investigator, John G. Sonnenberg, Ph.D., Uptown Research Institute (URI) is a leading clinical research site specializing in the study and treatment of mental health disorders. URI conducts research of the highest quality, bringing residents of Chicago's Uptown neighborhood and the greater Chicagoland community innovative treatments and compassionate care.

### INPATIENT UNIT

URI's private, 24-hour Clinical Research Unit (CRU) has hosted studies across neuroscience indications, including Phases I-III, PK, bioequivalence, and healthy volunteers, while providing a research milieu accommodating short-term stays for healthy volunteers and admissions of up to 8 weeks for acute schizophrenia indications. Adjacent to URI's outpatient center, the 2,000 sq. ft. CRU includes a nurses station (with crash cart), community room, dining room, quiet room, bathroom with shower, laundry room, and active 8 beds with an expanded capacity to 12. Subjects have access to a private smoking patio. Participants in the CRU are cared for by dedicated URI staff, under the directorship of physicians Board Certified in Psychiatry and Family Medicine. The medical staff maintains active credentials with several area hospitals and housing programs in order to ensure treatment continuity when step-up and step-down levels of care are warranted.

### INVESTIGATORS

#### John G. Sonnenberg, Ph.D.

- Clinical Psychologist
- Served as investigator on 150+ trials
- Publications in schizophrenia, long-acting injectables, affective disorders
- Faculty, Northwestern University Feinberg School of Medicine

#### **Michael Jutovsky, M.D.**

- Medical Director/Investigator
- Board Certified Family Practice

#### **Syed A. Rahim, M.D., ABPN**

- Sub-Investigator
- Board Certified Psychiatry

### INDICATIONS

- ADHD
- Anxiety Disorders
- Cognitive Impairment
- General Medicine
- Healthy Volunteers
- Medical Devices
- Mood Disorders
- Schizophrenia
- Substance Use Disorders

### CAPABILITIES

- Bioequivalence
- Pharmacokinetics
- Central IRB

### FACILITIES

- Private exam rooms
- CLIA Waived lab
- Secure drug storage
- ECG Machine
- URI's inpatient unit can sleep up to 12 subjects
- URI physicians are affiliated with local hospitals

### STAFF

- GCP trained / IATA Certified
- Dedicated Sub-Investigators, Raters, and Site Manager
- Full-time Study Coordinators

### RECRUITMENT

- Full-time recruitment staff with decades of experience
- Large patient database
- Referral relationships with psychiatric hospitals, community clinics, nursing homes, and more
- Convenient location in a densely populated area
